

Historical frame and evidence units

501 acquisition files • 207 historical extraction records

603 legacy conductivity rows

545 primary-view rows + 58 other rows
158 legacy group keys

↓ nested sample

Fixed sample within primary view

20 legacy keys • 118 rows • 130 facts
152 observation reports
Human verification incomplete

Fixed sample and retained core:
0 overlapping old rows or carriers

Source and measurement audit

162 paths • 571 observation reports
49 core-compatible old rows

↓ record mapping

35 retained core records

39 old rows • 34 profiles • 15 groups
10 other compatible rows had no
admissible scalar or unique sample

↓ task restriction

Numerical near-ambient bulk task

2 records • 2 singleton source groups
Both 30°C; exactly 25°C has 0 records
Five-fold source validation undefined

Links show nesting or mappings, not effects on model scores.
Reports can share events; source groups do not certify experimental independence.
